Portfolio: <https://portfolio-areeb-ng.vercel.app>

I'm a Computer Science graduate and Full Stack Developer. I build complete web applications from clean, responsive frontends to solid backend APIs. I work with React.js on the frontend and Node.js and Express.js on the backend. I have built projects like a full-stack e-commerce platform with Stripe payments and a real-time trading interface using WebSockets. I enjoy creating apps that are fast, scalable, and easy to use, and I'm always looking to learn and grow as a developer.

Work Experience

Tesseract Innovations

Frontend Engineer Intern | January 2026 – April 2026

- Developed a full-stack e-commerce website with Google authentication, Stripe payment integration, and product management features such as adding, updating, deleting, and viewing products using admin dashboard.
- Built a real-time trading interface using WebSockets to show live data updates.
- Built modern and responsive dashboard interfaces using React.js, focusing on clean design and easy usability.
- Connected the frontend with REST APIs to fetch and display dynamic data.
- Used modern React features like Hooks and a component-based structure to build maintainable applications.
- Created reusable UI components that work well on different screen sizes and devices.
- Managed application data and state using Redux.

TECHNICAL SKILLS

- React.js, JavaScript (ES6+), TypeScript, API Integration, Sockets, React Hooks, React Router, Redux, DOM Manipulation, HTML5, CSS3, SCSS, Tailwind CSS, Material UI, Responsive Design.
- Node.js, Express.js, RESTful API Development, Error Handling
- MongoDB, Mongoose, MySQL
- Data Structures & Algorithms, Asynchronous Programming, Object-Oriented Programming (OOP).
- Git, GitHub, Debugging, Postman, Chrome DevTools
-

PROJECTS

- Full-Stack E-Commerce Web Application:

Built a full-stack e-commerce website using React.js, Node.js, Express.js, and MongoDB. Added secure JWT authentication and Stripe payment integration for online payments. Developed features like

product listing, shopping cart, and a responsive admin dashboard to manage products. Also connected the frontend and backend using REST APIs and deployed the project on Vercel.

- **LPMM Poly Market Trading:**

Created the frontend of a real-time trading app using React.js and integrated Socket.IO to show live market data and instant updates. Designed a responsive and easy-to-use interface while handling real-time data smoothly.

- **FS Insurance LLC:**

Built a modern and fully responsive insurance website using React.js. Added smooth animations and transitions with Framer Motion to make the site feel more interactive and engaging. Focused on keeping the design clean and professional, while making sure it works smoothly and looks good on all devices.

- **Dashboards:**

Built multiple dashboard frontend applications using React.js. Added interactive charts using React Charts to present data in a clear and visual way. Focused on creating clean, responsive, and easy-to-use interfaces so users can quickly understand and interact with different types of data.

EDUCATION

- **Bachelor of Computer Science:** Sindh Madarsatul Islam University (SMIU), 2021 – 2025
- **Pre-Engineering:** SRE-Majeed College, 2018 – 2020
